

Faizan Muhammad

faizan.muham@gmail.com | faizan-m.github.io

Google

Software Engineer

July 2020 – Present

Mountain View, CA

- Search AI:
 - * Owning an LLM-integration framework enabling revolutionary ranking heuristics and search experiences
 - * Developing next-generation, production-grade tools for multi-step reasoning and knowledge representation
- Gemini:
 - * Productionized multi-modal Gemini models for serving, quantization, fine-tuning and evaluation [1]
 - * Translated experimental model code and checkpoints to the production-grade Gemini v1 launch
- TensorFlow:
 - * Re-architected `tf.function` by introducing new abstractions to radically improve consistency and performance
 - * *FunctionType*: comprehensive signature representation that controls type-checking, dispatch and tracing
 - * *AtomicFunction*: minimized Python overhead at the heart of `tf.function` and sped up Keras training by 4%
 - * As owner of the `tf.function` codebase, provided support and design consultation to users and developers

CTRL Labs (acquired by Meta)

Software Engineering Intern

May 2019 – August 2019

New York City, NY

- Engineered SLAM capabilities onto the wrist-mounted, EMG-based neural interface with a 3D camera attachment
- Devised interaction mechanisms combining localization and neural data and patented them [2]
- Orchestrated a neuromuscular teleoperation experience with a hexapod robot that was featured in an NPR show

Tufts University

Student, Research Assistant

Sep 2016 – May 2020

Boston, MA

- DARPA SAIL Open-World Novelty [3]
 - * Pioneered an AI agent architecture integrating symbolic and neural approaches to instill novelty resilience
 - * Led a group of graduate and undergraduate students to implement and publish the system architecture [3]
 - * AI Agent achieved top performance in independent external evaluations against other DARPA-selected teams
- ROS Augmented Reality Interface [4]
 - * A fast, high-bandwidth and accessible medium to convey robot perception, belief and planning in AR
 - * Won \$100K at Verizon 5G EdTech, received Computing Research Association award, and published it [4]
- Bachelor of Science in Computer Science
 - * *GPA*: 3.95, *Honors*: Summa Cum Laude, Lieutenant Commander Robert James Manning Prize
 - * *Highlight Courses*: RL, ML, Robotics, Computer Vision, Human Robot Interaction, Digital Circuits
 - * *Activities*: President @ Robotics Club, Organizer @ Undergraduate Research and Scholarship Symposium

International Mathematical Olympiad

Pakistani Team

Sep 2015 – Jul 2016

HKUST, Hong Kong

TECHNICAL SKILLS

Languages: Python, C++, C, Golang

Tools: TensorFlow, JAX, ROS, PyBind, Bazel, Beam
